Professional summary

I’m a Computer Science student at Egerton University with a passion for software development, problem-solving, and building innovative digital solutions. I have worked on projects such as ShuleCloud, RentalYetu, and the UniNotes app, and I’m continuously improving my skills to create technology that makes a real impact. My goal is to grow as a software developer, gain industry experience, and contribute to meaningful projects that solve real-world problems.

I build database-driven web applications with React, Node.js and PostgreSQL, and I am looking for an internship or junior developer role where I can keep growing by shipping real products.

Education

Bachelor of Science in Applied Computer Science

Egerton University, Kenya · 2024 – Present (expected 2028)

Relevant coursework: Web Development, Database Systems, Software Engineering, Object-Oriented Systems, Data Structures and Algorithms, Computer Networks, Artificial Intelligence, Software Project Management, E-Commerce, Digital Image Processing, Computer Graphics and Visualization.

Secondary Education

Ribe Boys High School, Kenya · 2020 – 2023

Technical skills

Programming languages	JavaScript, Python, Java, C++
Frontend development	React, HTML5, CSS3, Responsive design
Backend development	Node.js, REST APIs, MVC architecture
Databases	PostgreSQL, MySQL, MongoDB, Database design, CRUD operations
APIs and integrations	REST APIs, API integration
Developer tools	Visual Studio Code, NetBeans, Maven, Linux, Windows
Version control	Git, GitHub
Testing and deployment	Debugging, Troubleshooting *[to add: testing tools and deployment platforms you have actually used]*

Languages: English (good working proficiency), Kiswahili (good working proficiency)

Featured projects

Each entry states my role. Items shown as [to add: ...] are details still to be confirmed.

ShuleCloud

Education technology · Live

Role: Developer, in a team of 6

ShuleCloud is an education-technology web application built with React, Node.js and PostgreSQL by a team of six.

Developer in a team of six. The work covered frontend, backend functionality and database integration while implementing real user requirements. *[to add: the specific modules, pages or endpoints you personally built]*

Stack: React, Node.js, PostgreSQL

Visit shulecloud.com: shulecloud.com

RentalYetu

Property technology · Live

Role: Developer, in a team of 6

RentalYetu is a web-based rental and property platform built with React, Node.js and PostgreSQL by a team of six.

Developer in a team of six. The work covered web interfaces, application data management, backend development and database connectivity. *[to add: the specific workflows or features you personally built]*

Stack: React, Node.js, PostgreSQL

Visit rentalyetu.com: rentalyetu.com

UniNotes App

Student productivity and education · On Google Play

Role: Developer

UniNotes is an Android app published on Google Play.

Developer on the app, working with the same team as ShuleCloud. *[to add: your specific contribution and the team size for this app]*

Stack: *[to add: the technology stack (language, framework, backend)]*

View on Google Play: play.google.com/store/apps/details?id=com.shulecloud.uninotes

Point of Sale (POS)

Retail and business software · In development

Role: Solo developer

A point-of-sale system for retail and business use. It is still in development and I am building it solo.

Sole developer. The project is still in progress. *[to add: the features that already work today]*

Stack: *[to add: the technology stack]*
